### Sherwin Williams unveils new AWX™ Slow Basecoat Reducer

Sherwin-Williams Automotive Europe has unveiled its new AWX™ Slow Basecoat Reducer 455.0002, completing its waterborne products line. The AWX™ Slow Basecoat Reducer is an innovative basecoat thinner that has been introduced as an alternative to the Deionised Water 455.0600, to be used in hot temperatures mixed with AWX™ basecoats.

The nex product guarantees a slower drying action and reduces vapours in extreme temperatures conditions. It offers good working and mixing properties with AWX™ waterborne basecoats and allows a wider range of possibilities to use AWX™ basecoats on bigger surfaces.

For everyone who wants to improve profits, results and productivity with AWX™ waterborne system, the AWX™ Slow Basecoat Reducer represents the ideal technological solution.
